Completed Four Major Expeditions ACCEPTS NEW POSITION
While At McPherson

Prof. H. H. Nininger, formerly head of the biological department of the college, has accepted a position as curator of meteorites in the Colorado Museum of natural history at

orado Museum of natural history at Lenver and will soon move with his family to the Colorado capital. In his new work he will not only have charge of the meteorites but will also act as a field man in investigation and research work in all phases of natural science. The meteorites belonging to Professor Nininger will be exhibited in the Denver museum, and combined with the somewhat smaller collection the somewhat smaller collection there, will constitute the largest collection of meteorites west of Chi-cago and ranking in fourth the United The Colorado museum of natural history is generally recogniz-ed as being one of the finest in the country.

tinue in his work in his Palmer Lake laboratory which is furnished with the best equipment for cutting met-eorites. In choosing the Colorado corities. In choosing the Colorado museum for his place of work he was influenced by the desirable lo-cation, the presence of ample support for his scientific research, and his friendship with Prof. J. D. Figgins, well known scientist of the Museum Nininger states that there will be namerous scientific instruments available for use in his two laboratories that will enable him to conhis research studies more effi-

given and no doubt will be again this year. The state contest is to be here at McPherson college this year. The date is set for March 13th. There are three state prizes offered: \$35, \$25, and \$15 for first, second and third places. There are some new books and articles in the library that will be available to an For ten years Professor Nininger was head of the biology department and curator of the museum at Mc-Pherson college, having come to this city in 1920. During these years he has completed four major scientific expeditions and carried on an exten-sive research work, especially in the ass completed four major scientific some new books and articles in the expeditions and carried on an extensive research work, especially in the study of meteorites. He is well known in this particular field of science and McPherson loses a popular instructor.

Since coming to teach Professor Nininger has been busy with expedit test. If you are at all busy are at all busy and the professor Plays for the Red Crebs.

Since coming to teach Professor
Nininger has been busy with expeditions and experiments besides his teaching work. The College museum has been created largely through his efforts and contributions.

The discovery of thirty new species of invester can be created to be and of the contributions. of insectory of unitry low species of insects can be credited to he and his work, with Warren Knaus, a local newspaper man who is nationally known for his work with beetles.

Faculty Advices

IT IS YOUR PRIVILEGE TO VOTE

It is the privilege of every citizen of the state of Kansas of a voting age to go to the polls November 4 and select his choice of political leader.
Voting should not be a right as so many erroneously assert but should he a privilege, or a duty, a chance for us to show a bit of self confidence in ourselves in selecting the people we wish to run our governmental

ballot for their choice. Too many of us are continuously harping against certain phases of governmental action and the men that "we" have placed at the helm of our ship of state. We do not realize that we are responsible for the men that gain office and that it is up to us to place men in positions for which they are qualified.

If the spires of Oxford dream nowadays, their dreams must be night-

WHAT SHOULD A SENIOR KNOW?

The kind, quantity and quality of knowledge possessed by college seniors varies enormously in relation to nation ability, background, curriculum and other factors. But there are a few simple, homely truths which all seniors should know. The following are ago-old examples

Work is excellent medicine. When all other methods of obtaining happiness have failed, work usually is affective. Usually a person-who is engaged honestly and intelligently in honest work needs no other

2. A self-respecting person is neither ashamed nor proud to be s performing manual labor, nor to be seen at play if he plays without neg-lecting his responsibilities, nor to engage in sincere religious devotios.

3. No intelligent person will hold cheaply his promises or his signat-ure. An intelligent person's word is "as good as his bond." He fulfilis

his contracts, regardless of the losses he may suffer in so doing, for he knows that when his good-name is gone he has nothing left.

4. The more one knows the more modest one is, for newly acquired

facts open new vistas of the unknown and help us to see how ignoran-

 For a college graduate to be a good speller is not specially cred itable and for him to be a poor speller is somewhat disgraceful. The same kind of thing can be said truthfully of being honest and of being dishonest, of being industrious and being shiftless, and of many other contrasting qualities and accomplishments.

Few things worth having can be obtained without effort. The true values of many things are closely related to the effort required to

7. If one wishes to see beauty one has only to look about, in doubt, or when the immediate surroundings seem unattractive, one car

Most of us talk too much. Very few of us talk too little. There are too many speeches and most of them are too long. There is too little careful listening.

9. No matter how extensively modern conveniences may soften him and relieve him of offort, man continues to be a good deal of an animal; lie atill needs fresh air, sanshine, simple food, vigorous physical out-door activity and regular sleep. If he is deprived of any of these, he is less a man than he should be

10. Many of the facts we learn at college are soon forgotten or ded, but the benefits derived from the effort of learning them persist

moded, but the benefits derived from the effort of fearning them persist for years and years after graduation.

11. There is plenty of evil in the world, but there is much more of good than of evil, for otherwise mankind could not have survived. There is nothing to be afraid of except one's own imperfections; and to combat these can be made interesting and stimulating.

12. It is well to have the approval of one's friends and of the public but the really improvant thing is to have been superconductions.

lic, but the really important thing is to have honest approval of or

Like all statements of age-old truisms, each of the above is liable to he grossly misconstrued, especially by people wishing to rationalize their own errors.

-F. D. Farrell, president K. S. A. C.

In women intelligence, unlike beauty, grows steadily botter with age,-William Lyon Phelps.

NININGER THE SCIENTIST

Prof. H. H. Nininger's announcement of his connection with the Colorado museum is heard with both satisfaction and disappointment. After a decade of eminent service for his Alma Mater he leaves McPherson expect ing to continue his scientific studies on a wider scale. Besides his teaching in the College he was constantly busy conducting field trips or working in the museum and laboratory. That so busy a man could find time to carry on original research, and draft scientific paper, shows Professor

NININGER GIVES HIS FAREWELL IN CHAPEL

Tells Of Finding The World's Largest Stony Meteorite

Mon., Oct. 27-Prof. H. H. Nining er, former member of the faculty spoke in chapel this morning. He said that having been here as a studept and later as a member of the faculty made it hard to leave, but he believed he would be just as happy or a little happier in his new work. He thinks joys without sor-rows wouldn't amount to much. Take life as it comes without worrying.

For several years Prof. Nininge has been interested in meteorites, be cause of the mystery connected with their origin and their miraculous falling to the earth, and also they may be very valuable the future.

The experience of finding the large stone that weighed over 800 pounds was very interestingly told by Prof. Nininger. He said it was the larg-est known to fall on the earth. However he stated that we need not be afraid of being hit by a falling me-teorite as such a thing happens in Kansas only every 11,000 years.

Dr. Harnly expressed his appreci-ation of Prof. Nininger as a colleague in the science department and congratulated him on the splendid work which he has done for the College and for the field of science in gen-

BAKER REMAINS THE CONFERENCE LEADER

Lange Is The Whole Show Of The Game—Makes Six Touchdowns

McPHERSON 0, BAKER 54

Bulldogs Play Best Of The Seaso Lack The Scoring Ability

Fri., Oct. 24-Kermit Lange, Bak er ace backfield man scored six of his team's eight touchdowns and aided in the other two as McPherson college was taken for a trimming in a conference game tonight on the home field, defeating the Bulldogs 54 to 0, for the largest score ever recorded against a McPherson football

The school felt proud of its eleven because they fought gamely throughout the entire game but the Baker team was so much superior to them. The local team showed considerable development in every department of the game except punting. Lange ran wild, but he has a very bad habit of

that and several times it took the last man to bring him to earth.

The victory kept Bake, at the top of the conference, tied with St.

Mary's.

- DRIPPINGS -THE DOPE BUCKET

Despite the big score Friday night, we heard many good comments on the Bulldogs. They fought hard every minute even though it was a losing fight. Courage such as this brings out better support even though

The line fought as it never fought before. On the first Baker drive the line held the Wildeats for downs when it looked like a sure score.

Fight and encouragement from the Baker game is just conclusive ovidence that the Bulldogs have the right-stuff in them and that St. Mary's is going to get a real battle

The backfieldl tried its best to advance the ball and very few tackles were missed. The line opened up holes for the backs and showed a big

If the old fight like this keeps up. we are going to be very enthusiastic phout a certain game toward the close of the season—but we are not going to mention any names.

St. Mary's won over K-Wesleyan by a comfortable margin which makes the dope look dark for the Bulldogs, but what is dope compared to the old lighting spirit.

Buildogs, the game didn't look near as bad as the score indicated when taking in consideration and we're pulling harder than ever for you to bump St. Mary's off Thursday

GAMES THIS WEEK

EVANGELIST SPEAKS TO Y. M. MEMBERS

Tues., Oct. 28—"The very thought of God means character", said Rev. Nicodemus in Y. M. C. A. this morning.

The evangelist chose the Biblica character Stephen as an example of character stephen as an example of real manhood. Stephen was a man full of the Spirit, full of wisdom, full of faith, and full of power. Tru-ly, he was an ideal example for "Fullness of Manhood" which was

the subject of the talk.
