Former Macollege Student Returns To Teach English

Harley Stump, professor of English at McPherson College, declares that teaching at McPherson College is the most fun he has had in his whole life. He not only has a full time teaching job, but also serves as minister at the Pleasant View Church of the Brethren located at Darlow, Kas., six miles south of Hutchinson.

Prof. Stump is married and has two sons, Harl, who is a freshman at Macollege and Nelson, who is a junior at McPherson High School.

Prof. Stump says he really does not have too much free time with his teaching, preaching, and family, but he does have some hobbies. He enjoys writing verse, and has done some prose writing for the Gospel Messenger.

Also, he has a small printing press which he has carried with him across the U. S. When he was minister of the Empire Church of the Brethren in Central Northern California, he printed

LEROY HAYES — Leroy is from Geneseo, Kas. During high school he played in the backfield. Leroy weighs 155 pounds and stands 5' 10" tall. He has proved to be a good defensive player as well as a fullback.

and played fullback for the Bulldogs. Melvin is six feet tall and weighs 155 pounds. He is working out at guard and should develop into a fine lineman. He has a fine attitude and is willing to work. Melvin is from Lorraine, Kas.

HARL STUMP — Harl is from McPherson. He is 5'9" tall and weighs 155 pounds. He is working out at end and should develop into a fine wing man if he continues to show the drive and desire that he exhibited in early workouts.

DON WILLITS — Don is a second semester freshman from McClouth, Kas. He has returned after a time out from school. He is 6'3" tall and weighs 185 pounds. He is working at left end and doing a fine job. Don should make it really rough for the opposition.

Spotlighting the news this week are the nine freshmen members of the McPherson College football squad.

LYNN CABBAGE — Lynn has played some six-man football. He comes from Prairie City, Iowa, and is working out at the quarterback position. He weighs 155 pounds and stands six feet. Lynn has a very good attitude and is working hard to develop into a fine signal caller.

ROY JONES — He is from Cabool, Mo., and is also working out in the quarterback position. Roy is handling the ball like a veteran. Although he is small at 140 pounds he is determined to hold his ground. An injury received in practice has slowed him up a bit.

PAUL KOLMAN — Paul is the younger brother of Verlin and is almost like a carbon copy of him. He is 5'7" tall and weighs 147 pounds. He has never played 11 man football, but he has shown the desire and willingness to learn. His home is in Cuba, Kas.

IVAN PROCHASKA — "Pro," as he is called by most of the boys, is from Simpson High School where he played six-man football. He stands 6'3 1/2" in height and weighs 195 pounds. "Pro" has already received some experience from the tackle position and is one of the most promising freshmen.

MELVIN ROBERTS — Melvin is a center coming from Quinter, Kas. He is six feet tall, weighs 162 pounds, and has some of the fire and aggressiveness that his older brother had. He has a fine attitude and he will help out a great deal.

MELVIN ROLFS — Melvin is the brother of Merle Rolfs, who graduated from Mac last spring

Pondering With The President . . .

We Are Glad To See You

Each year we look forward to the several events during the year which bring us visitors. One of these comes at Regional Conference time. At this time friends of the college, workers in the church, parents and friends of the students come to us from areas hundreds of miles, or even more than a thousand miles, away.

We want you to come. McPherson College is your college. Many of the young people here are your children.

Many of you were in college here. Some of your parents were. Almost before you know it, some of you who feel quite young now, will have children and grandchildren here. It is good, therefore, for you to come and see what pro-

gress McPherson is making. We invite you to visit us thoroughly. Go through the dormitories. Look up the students in their rooms. Visit the classrooms and the playing field. Do not forget the museum which is on the top floor of Harnly Hall. Visit our Rural Life and Industrial Arts building.

Take a look at the College Farm, which is west of town. Visit Vaniman Hall and see what is happening in the field of art. Look us over carefully.

If you have advice and counsel to give us, do not hesitate to speak. We can grow and progress and improve only when our friends help us.

Welcome to McPherson! Be at home here! Come back again!

Mac Receives Last Of Grant

McPherson College received the final portion of the Ford Foundation grant during the past summer. The check was for \$46,500.

The total grant of \$91,500 must be invested and the income from the investment is to be used to increase faculty salaries. After 10 years the principle sum may be used for continued salary increases, or for other college purposes as determined by the board of trustees.

Over 600 privately supported colleges and universities in the United States received grants from the Ford Foundation.

Lehman Interprets Benet's "Western Star"

The "Peace Group" has Sheridan Ng, Mary Ann Guthals, and David Hykes as its steering committee. Lois Fager is the MCA representative for this group.

For programs they have had a panel discussion on military service, a talk by Leon Neher on "Peace", and a study of the Bible's background for peace led by Paul Wagoner.

Darry Melton and Doris Davidson are the steering committee for "Bible Personalities." This group has been discussing Jesus and they soon will begin a study of the minor prophets.

The four groups meet every Thursday evening from 6:45-8:00 on campus. Every student is automatically a member of this organization when he enrolls at Maccollege.

Don't Read It . . .

It's Not Too Late To Get A Date

By Norris and Carl
Students, beware! A valuable part of our social heritage has nearly slipped from our grasp. The ancient art of pitching woo has degenerated into a helter-skelter chaos of random mating. Just look at the evidence. Our college average of engagements for this year is way below the ten-year average of one per week. Men, where is your initiative? Girls, where are your diamonds? Jewelers, where are your profits? Men, the Queen's Banquet is coming up next Friday, and it is time for you to get on the ball and get a date. However, some of you may not know how to go about this.

Therefore, to remedy this situation, we present a new scientific approach known as the Harms and Harris Handy Helpful Heterosexual . . . (We couldn't think of a good word that started with an "H", fill one in yourself.)

To follow this scientific method it is necessary to have command of all the pertinent facts. Collect data on the names, size, shape, age, residence, shape, and phone number of all girls who belong to the McPherson College Faculty. The list of names and residences can be obtained from the Student Directory printed by the registrar's office. A phone book and tape measure are needed to obtain the other information.

This list must immediately be

revised by crossing off the names of all married women. Then draw a diamond beside the name of each engaged girl, and an asterisk (*) beside the seniors. This is to indicate that they are likely date bait, as this is their last year.

Now, on the basis of your research, choose a girl to bless with your charms. Your choice can best be made on the basis of our point system.

Score three points if she is pretty, three points if she has a nice personality, and three if she is intelligent.

If she has any two of these three characteristics, give her ten points, and if she has all three, send her name to the editor.

Once you have chosen the girl, formulate a plan of attack.

Using the scientific approach, you walk bravely up to the lucky young thing and say, "Hello, you doll, I've decided to give you a break and take you out tonight. Be ready in 15 minutes."

This method is scientifically calculated to sweep her off her feet. If it doesn't though, she may knock you off yours.

If by some chance she doesn't accept, by all means don't ask another girl for a date for a week, or the gossip on the Dotzour grapevine will ruin you.

And now, in closing, we again predict the coming of the E. O.

Successful Study Secrets

By Faus and Foley

Many students come to school without adequate study habits. Although MacCollege offers an orientation course to freshmen, we feel that this does not fully cover the field, so here are a few bits of advice submitted for your help.

The student will need some aid to study. We strongly recommend books for this purpose. Buy all the books you can lay hands on. Even if you never use them for study, you can burn them in the winter for heat. Then, too, you can throw them at proctors, or barricade your door with them when you have food in your room.

Another invaluable study habit is that of studying in advance. We heartily recommend studying ahead — blonde, brunette, or red-head.

Memory association is another great help to study. For instance, suppose you're trying to remember in history that women's suffrage was achieved in 1920. Next

to you in class sits a woman of 19 or 20 years of age. As for the suffrage part — well, we'll leave that to you.

Hurried cramming should be avoided in test preparation. Instead, the student should try to sleep on the material studied. This may have uncomfortable results, but if you're used to sleeping on a dorm bed, it probably makes no difference.

Finally, use your time to your best advantage. In a recent poll taken on Macampus, 50 per cent of the students interviewed wasted too much time at Dotzour, spending much of the precious time accomplishing nothing. As for Foley, he knits in the evening. F & . . . f
