This will conclude the Regional Youth Conference which began Thursday afternoon with registration and continued with Bible sessions, a panel discussion, and general sessions with West.

Construction On Buildings

Construction of the new Student Union Building and the addition to Dotzour Hall is progressing ahead of schedule as favorable weather has enabled work to con-

tinue through the winter.

Foundation walls, including the concrete support for the first floor of the Student Union, have been poured. Scaffolding and forms are being constructed for the pour-ing of the first floor.

A tunnel from the site of the new building to Mohler Hall has been completed. This will enable the Student Union to be heated by the Forney Heating Plant.

Foundation and the first floor of the addition to Dotzour Hall steel reinforcing for the second floor are being prepared. After the forms and reinforcing are completed, the second floor will be jacked into position

Construction of the third floor and the roof will precede this, and they will later be placed above the second floor.

Both buildings are expected to be completed this summer before the beginning of the 1961-62 school year.

Mac Debutante Greets **Regional Conference Guests**

Like a debutante at her coming-out party, Mc-Pherson College this year has been graciously welcoming guests with a beautiful, new, shining face to exhibit her growth.

Regional Youth are special guests of the year, for many of you are becoming acquainted with Mc-Pherson College for the first time and many also are making plans to attend our college in the future.

We are confident that you will like Mac's new look-not only for its beauty but also for its service value and convenience.

McPherson College has not stopped growing with the completion of Mohler Hall and Brown Auditorium. Construction again is already well underway for a new Student Union and an addition to the girls dormitory.

We at Mac think our college is doing a wonderful job of growing-with buildings, with education, and with social values. That's why we are here!

We hope you will enjoy your visit on our campus and will decide to come to McPherson College to participate in its promising future.

McPherson College Enlarges From 2 To 17 Buildings

McPherson Campus has enlarged from 2 to 17 buildings in a period of 75 years beginning in 1887 when the College was founded.

One of the first two buildings, made of cement blocks. When on the campus was the Main completed it had a gallery, show Building (later known as Sharp er, baths, ladies' gymnasium, and which was completed in lockers. 1897, It was 94 by 117 feet and Located in the basement of the "sufficiently far advanced" for library, the museum consisted of chapel and recitation purposes. mammals, birds, fossils, sea

Pinkerton's Detective Agency

I have on my desk a letter from Pinkerton's Detective Agency. Pinkerton's has been famous since Civil War days. They correlate somewhat with Scotland Yard in reputation.

Pinkerton's are now employed on many college campuses, they tell me in their letter. They suggest that we find out how reasonable the Pinkerton service is for college campuses.

I wondered whom it was they protect on a college campus.

This seemed to me an enigma of our age and time. Our news is filled with stories of violence. When you do not agree with someone you should oppose him violently; even damage his head or his reputation if you can. In our communities labor is often arrayed against management, race against race, religion against religion; in our world governments are set against other governments and economic group against economic group.

Even in some colleges apparently we now begin to need someone to protect us from each other.

I enjoy teaching a course called, "Growth of Culture". Somtimes I wonder in which direction our growth is headed.

Can we discover a way to make culture grow in the right direction?

First Winter Again

Toughest Driver in Town!

Careful Percy McFidget-who would believe that he's harder on his car than anybody in town? Why, he never goes over 35 or takes a trip over 10 miles!

Actually this kind of driving is very hard on a car engine because the engine seldom gets "warmed up" sufficiently. The oil tends to be sluggish. Sludge forms in the crankcase. The way is open for dangerous wear and corrosion.

But there's something you can do about this, to protect your motor. If you have to do a lot of startand-stop driving at low speeds, as most of us do, use Trop-Artic* Motor Oil. It flows fast . . . resists sludge formation . . . helps your car run better, longer. Get Trop-Artic Motor Oil at any station PHILLIPS where you see the Phillips 66 Shield.
