

McPHERSON COLLEGE LIBRARY

SERIES XL

NUMBER 3

AUGUST, 1928

PUBLISHED BY McPHERSON COLLEGE,  
McPHERSON, KANSAS

BULLETIN  
OF  
McPHERSON COLLEGE

The College Bulletin is issued in February, May,  
August and November of each year.

---

Entered as second class matter Feb. 26, 1913, at the post office  
at McPherson, Kansas, under post office number 1094.

## THE OPENING OF SCHOOL.

McPherson College will begin registration for the first semester on September 11, 1922. The process of registration will continue two days and classes will meet for the first time on Wednesday, September 13. Students should be present to enroll at the very beginning.

## NOTICE TO HIGH SCHOOL GRADUATES.

In order to facilitate the work of enrolling it is urgently requested that all who expect to classify as college freshmen bring with them a record of their credits earned in other schools properly signed by the school authorities. This record should be brought along for registration day or may be sent previous to that time. It may be mailed at any time to the Registrar, McPherson College, McPherson, Kansas. This notice regarding the transfer of credits will apply equally to those of other classification than freshmen. Please do not neglect this matter, for delay in turning in the transcripts will only delay your proper classification in the College.

## EQUIPMENT FOR THE SCIENCE HALL.

The new Science Hall is rapidly nearing completion and it is hoped that it will be ready for use at the opening of school on September 11.

Of the equipment that is to go into the building the McPherson Daily Republican of a recent date has the following to say:

Chemistry will occupy nearly the whole of the first floor of the Science Hall, and enough new tables are being made so that a total of 120 students

may be accommodated in the laboratories at one time. Each student will have a separate drawer and locker. Each table is equipped with water and gas. There will be 20 fume hood compartments, each equipped with gas and water, sliding glass doors, and glass partitions. The department of chemistry will thus be thoroughly modern in its equipment.

The department of Physics will get nine new tables, ranging in length from six to sixteen feet, and all of them equipped with sinks, water, air, steam, and gas. These will be placed in the south rooms of the second story of the building. On the same floor will be located the Home Economics department, for which a liberal supply of material is being constructed. There will be 8 cooking tables, accommodating 16 students in one section and 5 sewing tables, accommodating 20 students in one section. There will also be special tables for draughting and designing and cutting and a group of sewing tables. Other special features will be a fitting stand, a triplicate pedestal full-length mirror, and a supply case with sliding glass doors, work shelf, drawers, shelving space, flour bins, and cupboard.

The Department of Agriculture will occupy the south end of the third story of the building and for its equipment the following are now being constructed: One large portable lead-lined germinating bed, two 12-foot work tables, accommodating 16 students in one section, two chemistry tables, accommodating 30 people at once, and two supply cases with sliding glass doors, shelving space for display of specimens, drawer space, and cupboards. Biology will be located in the north end of the third story and ample provision is made for the equipment of that department. Six large taper-topped tables, 14 feet long and tapering from 5 feet at one end to 3 at the other, will accommodate some 50 students at once. These

will be placed in two different rooms. A slide cabinet holding 1,200 slides will serve both Dr. Harnly and Professor Nininger. A supply case like that in use in other departments will also be furnished.

Each of the five science departments will be equipped with a handsome desk for the instructor, the desk arranged with a sink, water, steam, gas, air, and electricity. Each of the teachers will have a private laboratory and office.

Great effort has been expended to make sure that the table tops, 57 in number shall be substantial. They are made of birch strips, 2 inches thick and 2½ inches wide, tongued and grooved, and glued with waterproof glue. The ends of the table tops will be reinforced with heavy bolts running laterally near the ends. Aside from these tops, all of the furniture is constructed out of the best grade of kiln dried oak. Strictly factory processes are employed in the work. The shop is equipped with wood working machinery sufficient for the purpose.

The fitting is being done by Bell & Thacker of this city and all the lumber is being furnished by the Home Lumber Company.

---

### GRADUATING CLASSES LEAVE GIFTS

The college was made the happy recipient last Commencement season of some gifts that will for years attest the good will of the seniors of the college and academy classes of 1922. The college seniors presented to the college eight magnificent museum cases, the cost of which, if bought from the factory, would aggregate one thousand dollars. However, the class saved money by securing the services of the Industrial Education department, which, under the direction of Professor Swope, did an excellent piece of work. The senior academy class remembered the college with a beautiful and useful

trophy case. All of these memorials will be placed on the fourth floor of the new Science Hall, where the museum will be located.

---

### SOME IMPROVEMENTS ON THE CAMPUS

Aside from the completion of the Science Hall there will be some improvements on the campus that the students will note by the opening of school in September. About twenty feet have been added to the smoke stack of the engine house. Paint has been applied to the woodwork of the Library, Fahnstock Hall, and Sharp Hall. The roof of Fahnstock and Sharp Halls have been treated to a coat of paint. A north entrance to Sharp Hall is completed and a walk is to connect this with the Science Hall. Another walk will connect the new building with the gymnasium walk. It is also planned to make many necessary interior improvements.

---

### RADIO INSTALLED

During the summer a radio receiving station was installed at the college by Professor Morris and Lewis Florman. Messages were very readily picked up from some distance. The instrument will be located in Professor Morris's headquarters in the Science Hall. Poles are erected on the building for the necessary wires.

---

### GIFTS TO MUSEUM

Last winter Professor J. E. Gilbert of California very kindly gave his alma mater a rare specimen of saber toothed tiger which he and others unearthed in the La Brea fossil beds of California. Early in July this specimen was mounted by Mr. George Hollenberg and will be placed in the museum. It is in excellent shape and the mounting was very skillfully done. Mr. Hollenberg also mounted a monkey while

at the college. Rev. Frank H. Crumpacker, missionary to China, is the donor of a wild boar's hide which he secured last winter while engaged in his favorite sport in China. It will also be mounted and placed in the museum. The college desires to thank most heartily all the donors and to express a wish that others may remember the museum in a similar way. All donations are gratefully received.

---

### NEW TEACHERS

Mr. C. Ray Keim, a graduate of Manchester College, Indiana, will do graduate work in M. C. this year and also teach two courses in the academy. Miss Elsie Klinkerman, a former student and a graduate of the Normal course in music, will succeed Miss Pauline Vaniman as instructor in Piano. Miss Klinkerman is an experienced teacher. The last two years she has studied in the Bethany Conservatory at Lindsborg from which institution she holds an artist's certificate.

---

### A SERIOUS SITUATION.

The Science Hall will be completed by the opening of school in September. It is a beautiful building that should please every friend of the College. Nothing has been overlooked in planning and constructing this building to make it substantial and most adaptable to the purposes for which it is built.

We are, however, facing a grave situation. Pledges covering the cost of this building were made before it was begun. About one-half was collected. It was all promised in good faith and we assumed that most or all of the remainder past the payment date, would be paid upon notice that the money was needed.

Here was the situation Aug. 10:

The Treasurer had received and expended \$76,-

368 with a balance in the bank of \$8,000, making a total received of \$84,868. Of this amount \$9,000 was borrowed. The building when completed as per contracts will cost \$120,000, which means that approximately \$35,632 will have to be secured in the next thirty days. "Where shall we get it?" is the question that now puzzles the trustees. We appeal to the friends who have so kindly subscribed to the funds for this much needed building. We urge that where at all possible subscriptions be paid within the next thirty or sixty days. The trustees went ahead, believing that the money would be paid and they still feel confident that it will be. Send a check to the Treasurer of McPherson College. This situation is a grave one as we said in the beginning and can only be relieved by the payment of the pledges that are now past due.

J. J. YODER, Treas.
