## MEM'S BIBLE CLASS HOST UNDERCLASS MEN

### A Get-Acquainted Fellowship Hour Is Enjoyed Around The Banquet Table

#### DR. SCHWALM TOASTMASTER

New Officers of Bible Class Are Introduced By Dr. Schwalm

Thurs., Sept. 28—At six forty-five this evening the Freshman and Sophomore Sunday School Class was the guests of the Men's Bible class of the Church of the Brethren in the parlors of the church. A get-acquainted fellowship evening was enjoyed around the banquet table.

Dr. V. F. Schwalm, president of the college, was in charge of the program. At six forty-five the men were ushered into the banquet hall and Harold Beaman lead the group in singing.

After the meal Mr. Blanch Harris, president of the Freshman class of the college, sang two solos, "Ships that Never Come In" and "Ireland must be Heaven for My Mother Come from There".

Ray Kraham, former president of the Men's Bible class, extended the welcome to the new members and to the Freshman-Sophomore class. Fred Andrews, president of the Freshman-Sophomore class responded.

The new officers of the Men's Bible class were introduced by Dr. Schwalm. Ernest Wall, president; N. S. Rhodes, vice-president and Prof. L. A. Ulrich, secretary and treasurer.

Dr. Schwalm presented a special gift to Prof. Hugh Heckman, teacher of the men's class, given by Mr. F. A. Yalcman. Marion Krehbiel presented two saxophone solos, accompanied by Mrs. Krehbiel.

Paul "B" Bergant and Walter Ebbmore spoke of the value and good received from a man's Bible class.

Laverne Turner, accompanied by Miss Ruth Turner, played two flute solos.

At the close of the evening Mr. Stearns lead the group in singing. The banquet was served by the ladies of the church.

## "M" CLUB HIKE TO BRUBAKER'S PASTURE

Tues., Sept. 24—"We should stick together and there should be no individualism in the team this season," stated Coach Geo. Gardner this evening at the "M" Club hike.

After football practice this evening the "M" Club entertained the football squads to a hike to Brubaker's pasture. After a light lunch of "hot dogs" and Makino pies "Red" King and Ernest Hietz took the with all allegiance to the "M" Club. Both Hietz and King were initiated last week.

At the close of the event Coach Gardner gave a little talk to the group and explained the changes in the football rules. About thirty-five were present.

## FRESHMEN GO TO ANDERSON'S GROVE

Fri., Sept. 27—This evening sixty members of the Freshman class put away all care, worry and trouble and hiked to Anderson's Grove for an evening frolic, fun and good eats.

A large fire was kindled immediately upon arriving at the grove and soon one could smell the appetizing odor of roasted walnuts and marshmallows. To make the meal complete, beans, pickles and apples were served.

After a few hours of games the group sang some college songs and then hiked back to their various places of abode. Miss Lehman went along to keep all the children out of mischief.

Lola Dell spent Friday night at McPherson. On Saturday her brother, Ted, and Pauline Dell went to their home near Beatrice, Nebraska.

## ALUMNI AND ALMA MATER

When we as individuals become members of the Alumni body we are accorded a vastly greater opportunity to live a full life, together with a greater obligation which that privilege gives. As in the service of the servants entrusted with their master's goods, "Who so has the greater opportunity has also the greater responsibility".

The association of alumni does not face the responsibility, the greatest measure of it falls upon every member, and our honor should compel us to give valuable services not only to the school but to the communities in which we are all working. We who are scattered over this whole world can be a great force to keep the spirit of our Alma Mater alive.

Let us be proud that we are graduates of McPherson College, the achievements that have been made is proof enough that there is great vitality in our Alma Mater. Our obligation is not an additional burden laid upon our shoulders, it is an opportunity provided for growth in personality, for the exercise of the great human impulse to do good—to serve humanity,—to leave an impression that is worth while. Let us look to the future, may the dreams of past years reach their fulfillment this year.

John Wall, President Alumni Association.

The relation of the alumni of a college to their Alma Mater is like that of children to the home which they have left. It is one of affectionate regard because of the memories of a pleasant past, and deep concern and interest in its future. The alumni and former students of McPherson College are no exception in this rule. Almost weekly there is the return to the colleges of some alumnus. Always when members of the faculty meet the alumni, whether it be out in some far flung frontier or in some nearby village or town, there is eager inquiry about the Alma Mater.

During these two years, some local improvements have been made on the campus, a new chapel has been built, hall-ways have been redecorated, new offices arranged for, and the campus improved. Problems of faculty organization as well as curriculum planning and building have received considerable attention. Representatives of the college have visited every part of our vast territory. They find an unusual manifestation of good will toward the college throughout our territory. The kindly interest through the whole college is most gratifying.

The new year has started out auspiciously. The quality of students is most excellent. We believe we face a great year. It is our hope that this year shall mark the beginning of some forward movements that shall mean distinct progress for the college. We trust that the alumni shall be prepared in the near future to make a substantial contribution to the permanent well-being of the college.

Dr. V. F. Schwalm, President McPherson College.

## THESPIAN CLUB TO GIVE PLAY FIRST OF DECEMBER

### Play Is To Be Sponsored Independent Of The Student Council

#### ONLY NINE MEMBERS BACK

##### Tryouts For New Members Will Be Held In The Next Week Or Two

Fri., Sept. 27—The Thespian Club, dramatic organization of the college, decided at their first meeting of the year this morning to present a play sometime in the first week of December and that the club would give it independent of the Student Council.

No play has yet been selected by the organization but a number of the members are reading a group of suggested plays of a varied nature. The club will decide upon one play soon.

In previous years the Student Council has sponsored all activities of the Thespian Club and a number of events have not been a financial success and the club has decided to govern the production of its own resources.

After a check-up of its members the organization decided that an increase in membership was necessary. No definite arrangements have been made to secure new members. The constitution of the society reads that no person shall become a member unless he or she has received a course of dramatic work while in college. Members may be voted in with a unanimous vote of all members.

Mrs. Glutz, instructor in the dramatic work of the college, is the new sponsor of the organization. She is filling the place made vacant by Miss Della Lehman, who is our dean of the dramatic department this year. Miss Lehman is working in the English department. Mrs. Glutz will coach the Thespian play.

Miss Bernice McCallan, president of the dramatic club, has appointed Roland Lindell as one of a committee, probably three, to sponsor and judge all tryouts for the play if others are invited to try out.

The Thespian Club constitutes the following members: Bernice McCallan, president, Roland Lindell, vice president, Merrill Hoover, secretary and treasurer, Ruth Hilkensstaff, Sylvia Edgcomb, Mildred Swanson, John Lehman, Chester Carter, Beth Hill, and Miss Della Lehman, honorary member.

## JUNIOR CLASS PICNIC AT VOSHEL GROVE

Prof. J. Brewster, High School Teacher, Chaperon's Time Class

Fri., Sept. 27—The Junior class ventured to the Voshel Grove, about seven miles south of the city, this evening for their first social picnic of the year.

The picnic was formerly to be staged at the Jungles, two miles southwest of the college, but on arriving at the appointed grounds they found to their surprise that another group of picnickers had arrived ahead of them. Someone suggested that the class go to Voshel's Grove further south.

With great enthusiasm the three cars of Juniors, accompanied with their chaperon, Prof. J. Brewster of the city high school, motored on south and found a grove more lovely than the one first planned.

In the sparkling fountain of a medieval forest the class played such games as "traveller", "leap-frog", and others too numerous to mention. The spring pruned apples each member was given a slice of beef-steak and smoked it in the original manner—over a roaring open fire. Beans, pickles, doughnuts, potato-chips and cider—all devoured to the tune of "Gee, Gee, Makes You Wider".

Returning to the campus at a rather late hour, with the consolation that tomorrow was Saturday, the tired Juniors manifested a feeling of tiredness.

PROF. ROY C. PETRY

New instructor in the history department while Prof. J. H. Bright continues his studies at the University of Wisconsin. Prof. Petry comes well recommended from the University of Chicago.

## Y. M. C. A. IS PLANNING A BUMPER YEAR

Tues., Sept. 24—The Y. M. C. A. is to have several noted speakers visit our campus it was revealed this morning at the regular meeting. Another revelation was that funds would be necessary. This was prefaced by Clarence Zink who conducted the devotionals on the theme of talents and how to use them.

Laverne Turner made an appeal for money, not alone to support the organization, but as a training for future service and stewardship. The treasurer, Fred Andrews, made a financial statement including the proposed budget. Of particular interest is the item for the purpose of bringing noted speakers to the campus.

The large attendance indicates the probability of a very effective organization, but an effort is being made to interest a still greater number.

## COMING EVENTS

Wed. Oct. 2.—Y. W. Candle-lighting service.  
Fri. Oct. 4.—Game at Salina.

## DIGNIFIED FACULTY PICNIC FRIDAY EVENING

No Formal Meeting Followed The Entertainment Of The Evening

Fri., Sept. 27—It seems that members of the faculty were unable to resist the call of the outdoors at the glorious time of the year and this evening they left the campus carrying with them the provisions for a delicious lunch and the necessary equipment for a variety of lively games. They found their way, arched ditches and drainage were known by that beautiful little spot known as the Second Stand.

Three games, baseball, croquet and horseshoe contests claimed the attention of those indispensable members of our school family and as their tired bodies that they were very glad to eat the bacon and egg sandwiches, wieners and buns, pickles, potato chips, ice cream sandwiches, coffee and watermelon which had been provided.

The faculty members interviewed stated that no formal meeting followed the supper but that the picnic was just a good get-together and that no one fell into the water or sprained his ankle but that all seemed to have a jolly good time.

PROF. EARE R. BOHLING

Prof. Bohling is filling the vacancy made vacant by Miss Mildred Lamb. Prof. Bohling has his A. B. and B. S. degrees from the University of Kansas and Kansas Wesleyan University.

## W. A. A. STARTS ITS SOCCER PRACTICE

Wed. Sept. 25—The girls' soccer team was announced this morning. A varsity team will be chosen from the three teams that were announced. The teams are as follows:

Team one—Viola Dewhirst, Vera Thompson, Sylvia Edgcomb, Jennie Yarnall, Helen Huskirk, Beth Hess, Ethel Hoover, Esther Brown, Florence Weaver, Jack Ballard, and Ada Frank.

Team two—Louise Allen, Margaret Stegman, Velma Wine, Elaine Gustafson, Mildred Swanson, Arilla Anderson, Mabel Lee Early, Blanch Halperson, Emma Heckman, Velma Halpernough, and Beulah Hilkensstaff.

Team three—Arlie Wattenbarger, Ruth Hilkensstaff, Nellie Collins, Edna Crist, Helen Klies, Letha Allen, Ethel Jamison, Lola Mac-Hanlon, Mildred High, and Mildred Dohy.

## HAIL! ALUMNI

Hail Alumni, both of the fair and the unkind sex. Great is our rejoicing thereof to welcome you back to your by-curved Alma Mater and the fountain with a leak which marks the parting of the ways between the domiciles of the young, the fair, and the homelier and also of the opposite.

It must be a great and superlatively glorious feeling to be out in the large, wide and cruel world engaged in the act of wrestling a living wage from unfeeling school boards and hard-boiled superintendents. It must be next to impossible to have enough money to keep your selves in neckties and Yo Yos.

We want you to know that we remember M. C. hopefuls miss all your bright and otherwise intelligent faces which were once sprinkled so profusely about our campus. The boys

need your sage and angelical advice upon the subject at various things. The girls wonder how so many rich boys carried off successfully in the past, such as the proper technique of having the boy friend send up a hamburger on a string and how "feeds" can be collected at two A. M. without detection. Alumni, we cry for knowledge, information and all other expressions of how you got by!

We need Paul Dick to tell us Scotch jokes and to warble in the parlor after supper. We want the scintillating brilliancy, back football and material of the most popular man ever on the campus—Sam Korte. Barton, the M. C. song bird, is remembered with tenderness (sniffles). "Chevy" Moran, Howard Kaim, and "Babe" Martin (the Unholy Trinity of M. C.) are all thought of in terms of hope, faith, and charity. Seems too

must always here without verbiage ("berky"). The dramatic personality of Ernest Toland is surely lacking who when cracks of "Push" burst are quite in demand. The executive ability of John Wall, the treasurer of '29, is going to be put to the utmost as President of the Association.

Seriously though the Alumni does give the college an air of grandeur if you did give the college the air but only because you could not remain in school longer. Your careers were pulling you and they will eventually "fall" your hand—How philosophical! Most of the alumni are quite unappreciated now and would not think of using "language" now but it will listen to you: what you learned in college, and the "language"!

Issue 133 the alumni page in Spectator.  
Sam-Gee.

### BELIEVE IT OR NOT

If a student possessed the desire to receive credit in every course offered in McPherson College and the desire would be realized, eight and one-half years would have to be spent in this institution of learning.

If a freshman, starting in this year, was to take every subject, and carrying fifteen hours a semester, he would not complete his course till the year 1940.

Such a person taking all courses would have 148 hours of elective subjects.

If such a person were to attend class regularly for all courses offered and if all the classes were combined into one class, it would be in session 684 hours or about 232 days.

If all the classes of a four year student were combined into one class he would have one sitting of 2322 hours or about 117.5 days.

What degree or degrees would such a student receive if he attended school at McPherson College for eight and one-half years?

### WHAT TO PRINT, AND WHAT NOT TO PRINT

The following article which appeared in the Haverford News may be applied also to our own SPECTATOR:

Haverford, Pa.,—"You can't print that. Seeing that article in a student paper, the public will take it as the official opinion of the college and we can't allow that!"

This is the argument that keeps many college papers from printing much of anything besides colorless lecture notes and club activities. Such reasoning has also brought the ax down on the head of more than one offending editor.

For this reason the bold-face statement printed in large type above the editorial columns of the Haverford News is worthy of notice:

"Editorials in the News do not necessarily represent the opinion of a majority of the undergraduates, faculty or alumni. They are designed instead to arouse intelligent discussion of such Haverford problems as the News believes merit the consideration of those interested in the college. Constructive communications concerning Haverford problems or the conduct of this newspaper, whether favorable or opposing the stand taken by this paper, are welcomed by the editor and will be published on this page."  
—By New Student Service.

### THE COLLEGE INFLUENCE

From the Columbus Dispatch.

An educator still comparatively young was telling the public, two or three weeks ago, that his experience in traveling about meeting men in Pullman smoking rooms, etc., has proved to him that the college influence wears away and disappears within a few years after graduation. One would like to know just what the nature of the college influence had been on the particular critic, and whether he is really entitled to pass as an accurate judge of the signs—or lack of signs—of that influence in others.

We were interested to learn from last week's London cable dispatches that Ambassador Dewee is not going to leave London for a summer vacation, being so fascinated with the great city's art galleries, many museums, architectural and other traces of the Roman, Anglo-Saxon, Danish and Norman periods, etc., that he is quite content to let attractions outside of London wait. Here we have the older type of college graduates—more specifically, the graduates of Marietta college in the early '80s, when the natural interest was still strong, and the student could not get to his A. B. degree except by a path which brought him into close contact with those phases of human development that have left their marks so visible in the great old city of London.

A college man who could not tell that Charles G. Dewee is a college man without looking him up in Who's Who must have graduated in comparatively recent years, when one can reach his A. B. without necessarily knowing that Greeks, Romans, Anglo-Saxons and Normans ever existed. The influence exerted by colleges like Marietta, when Ambassador Dewee was young, does not wear off.

### ELEANOR KILLED BY TRAMWAY CRASH

Eleanor was jealous. She was always demanding the supreme attention of her admirers. They spoiled and adored her beautiful hair. They fed her candy and other tasty sweets. The office boys always spoke to her and were courteous, kind, and loving.

But Eleanor was jealous. She would not and wrinkle up her little face in comical agony whenever another of her kind came into the office.

This morning the crisis came. When the society editor appeared for work this morning she brought with her a wife of a little creature. The office force forgot Eleanor entirely and crowded around the new comer with great admiration. Seemingly Eleanor realized her plight and wished to end it all. Could she share the admiration of the force with this new one? No—and what's more, she wouldn't.

Seizing upon the opportunity afforded by an outgoing member of the force she dashed out through the door into the street. In a frenzy of rage and jealousy she dashed at a maddening push across the crowded street. Midway she hesitated, and her fair and beautiful countenance was crushed beneath the onrushing wheels of a street car. Only the mangled and bleeding body remained. Eleanor was the office cat.

... and jealousy she dashed at a maddening push across the crowded street. Midway she hesitated, and her fair and beautiful countenance was crushed beneath the onrushing wheels of a street car. Only the mangled and bleeding body remained. Eleanor was the office cat.

### Bulldogmas

Hoo! Headline—"Dog Attacks College President!" And then someone said, "Funny it wasn't a squirrel!"

The librarian says to go somewhere besides the library to visit. We suggest the title in the "Ad" building.

Florence Weaver and Mildred Doyle use the fire escape in the daytime so they can find it after dark.

The Grand Canyon was made by a college Business Manager who dropped a penny in a gutter hole.

Any cat run in the cat's whiskers but it takes it time out to be a cat's paw.

If some people know how much fun campus days were they wouldn't want to stop them.

### CRABLE ROLL

Ruth Dickenstaff	Oct. 4
C. Lillem Goldman	Oct. 2
Ethel Jamison	Oct. 6
Harvey "Red" King	Oct. 3
Una Morise	Oct. 1
Glen Selix	Oct. 4
Byron Swain	Oct. 5
Mary Weddie	Oct. 5

### FROM OTHER HILLS

The registration at the University of Kansas has gone over the 4000 mark setting a new record. The previous first week high total set in 1888 has been passed. The school of medicine shows an increase over the previous year.

Mrs. Mildred Lamb Le Spur, A. B. Kansas University and A. M. Lincoln Stanford will take over an additional section of a 3 hour course in Economic History at the University of Kansas. Mrs. Le Spur held a fellowship at Stanford and last year was professor of commerce at McPherson College.

The Kansas State Teachers College at Hays is working out a thorough health program this year. The Department of Health organized last June will co-operate with the department of physical education for men and for women in seeing that everyone's physical needs receive attention.

Dr. Farley P. Womer has resigned as administrative head at Washburn College after 14 years of service. The board has refused to accept his resignation and he had agreed to remain in charge until a competent successor can be found.

### DEGREES THAT WERE GIVEN THIS SUMMER

At the close of McPherson College Summer School degrees were given to the following students:  
Ferns Galle, A. B., Helen Barber, A. B., Haven Hutchinson A. K. Leila Hultquist, A. B., Owen Galle, B. S., Melba Mahler, B. S., Leonard Crumacker, B. S., Chester Bishop, B. S., Partin Vaughn, B. M., Ferns Galle, Music Diploma, Martha Krehbiel, Music Diploma.

### BULLDOGS! BULLDOGS!

Bulldogs! Bulldogs! Where is your puss? There were only a few who came to see the Bulldogs off on Thursday morning when the whole student body should have been there. After a couple yells were given the boys left for a smashing victory.

### 'SWEDES' MAKE FIRST VISIT ON CAMPUS

Once more our "blond haired" friends of the north have swooped down upon our campus. They did not possess the familiar "pale-pot" nor did they have any stickers, nor were they compelled to be on their defense as they entered. This time it was a crusade of friendship toward our own weaker sex.

It was dark, and seventeen "barley Sweden" descended from trees of Henry P.'s modern means of transportation. Their missions resembled that of the Roman story of old.

The time was late, and all good little Bulldog beauties were supposed to be in their kennels. They, the "Terrible Swedes," advanced first upon the home of the gallant youths, the firm believers of "Bulldogdom." They inquired for permission, showing the power of man over woman, to ring for the girls who were already drifting and dreaming in their "Beneath Heaven." Permission was granted, with pleasure.

They crowded below the steps of Arnold, beneath the romantic fire-escapes, and under the darkened windows. They sang, and oh, what melody of dream did they spill forth! These bear-tones whom helped with the harmony of the tenors and mingled in with the bass of some future Caruso, an imaginary base of friendship, of departing troubles, and the wayward splashes of a wicked brush—they were gone, but not forgotten. Those memories of a hostile relation were strengthened.

They came, and sang, and have gone back into the north. It was late and we were tired—so we went to bed.

### HOFF IN ADVERTISING WORK IN CHICAGO

In a recent letter from John L. Hoff, a former professor of McPherson College, the nature of his new work is revealed. Mr. Hoff is associated with the Benson, Gambie, Johnson and Read, General Advertising Agency of Chicago. Mr. Hoff writes: "I am writing a series of twenty-five or thirty full-page newspaper advertisements for the United States Daily of Washington. They are to run every other week through the coming months, starting some time in October. In addition, I have been writing radio talks and other types of ads, but this series is my major project for the near future."

"Each one of these 'ads' is to give a bird's eye view of some outstanding American industry; or in other words humanize and popularize the story of that industry, depicting the mechanical and technical advances as well as the social contributions. For instance, one of the 'ads' will probably bear the headline 'The Triumph of the Kilowatt' and it will endeavor to tell the romance of electric light and power, giving in story form the evolution of electrical developments and then telling a few of the present-day marvels of electrical energy. The 'ad' will begin somewhat like this: 'Thirty-seven hundred years ago, Thales, rubbing a piece of amber with cloth, found that it attracted feathers and leaves.' Then it will relate the work of Franklin, Faraday, and other pioneers in that field.

"Other 'ads' will deal with iron, and steel, coal, railroads, ice, water, chemicals, automobiles, and so on through the list of two dozen or more different fields. Probable headlines for some of these are as follows:

follows: "Wilson Sentinals of Progress" (dumber); "The Death of the Fossil Fuel" (go), etc. "I Had the object of promoting educational value even from a personal standpoint, and really a thrilling investigation."

### EMINENT SPEAKER BEWITS CAMPUS

Fri., Sept. 20—"Dad" Elliott, eminent Y. M. speaker and speaker, was a visitor at McPherson College today, speaking in chapel this morning, at a mass meeting in the afternoon and in the evening speaking before the Y. W. and the Y. C. cabinets at a luncheon.

"Dad" says, "The problem of youth of today is that of their elders, the youth is the product of the environment created by his elders and his youth is in a bad way or it is because the elders are more or less in a bad way."

College youth, he declared, for the last two generations have received just enough education to enable them to think their way through to recultivate.

But now, according to the speaker, the moral and spiritual side is in the burning question before the college student. "What implications are there for me in the fact that the life like Jesus and that Christ's life exemplifies the ideal relationship between man and his fellow-men?" "Dad" used football analogy and football terms to point the student toward the Jesus way of living. In the first place one must join the squad, then he must adjust his legalities to put first things first. He must then put himself, without reservation, under the direction of the Coach. He must learn the rules of the game from the Hook, the Coach and the other players. And finally, he must play the game.

### Y. M. MAKES IMPROVEMENT

The Y. M. C. A. has recently placed in the hallway of the "Ad" building a new bulletin board. It is glass-enclosed and may be moved from one place to another. Announcements are posted in changeable letters and is used to announce the respective meetings and programs of the organization.

### NINETY-ONE PER CENT OF GRADUATES TEACHING

This Is A Distinct Compliment To McPherson College

### FEW CAN BOAST SUCH RECORD

Some Are Teachers In The Largest School Systems In The Country

(From the Spectator Sept. 24)

According to records of the college registrar, J. A. Blair, 91 per cent of students graduated here last year hold responsible positions in public schools throughout the middle west this season. This fact is a distinct compliment to McPherson College.

Many of these alumni are leading in some of the largest school systems in the country. Mr. Leo Duke holds a responsible position in the largest high school in Cincinnati, Ohio. Others who are teaching in some of the largest systems are located in McPherson, Kansas; Marion, Kansas; Hays, Kansas; Elsworth, Kansas; Paola, Colorado; Ellwood, Kansas; and Phillipsburg, Kansas.

It is stated that few Kansas colleges can boast of such a record. Statistics of the State Board of Education show that only a small percent of college graduates actually receive the teaching position to which they aspire.

A list of last year's graduates who hold teaching positions, and where they are teaching is given below:

- Lois Weaver, near Cedar Rapids, Iowa; Ruth Bish, near Pueblo, Colorado; Chester Bishop, La Harpe, Kansas; Archie Blickestadt, Little River, Kansas; Ralph Bricham, Sylvan Grove, Kansas; Phyllis Brown, Elwood, Kansas; Thelma Budek, Gypsum, Kansas; Vera Cade, Abbeville, Kansas; Elsie Crisman, Sylvia, Iowa; Crumpacker, Winona, Kansas; Lois Dell, Winona, Kansas; Margaret De Villias, Lost Springs, Kansas; Leo Duke, Cincinnati, Ohio; Ruth Egan, Hays, Kansas; Esther Freeburg, Camden Point, Missouri; Fern Galle, Langdon, Kansas; Clara Grabner, Macksville, Kansas; G. Hall, Moundridge, Kansas; Ruth Helbert, Kanopolis, Kansas; Ruth Hoffink, McPherson, Kansas; Ida Kinsey, Roxbury, Kansas; Muriel Kaufman, Nashville, Kansas; Beida Mohler, Huxbury, Kansas; Norma Miller, Lathrop, Kansas; Alison Gurd, McPherson, Kansas; Maria Delmer, Canton, Kansas; Mervin Mae Shatt, Langdon, Kansas; Mervin O. Steffen, Olin, Kansas; Ernest Toland, Durham, Kansas; D. L. Miller, Winona, Kansas; Eunice Longsdorf, Elsworth, Kansas; Mildred Laby, Geneva, Kansas; Ralph Landis, Jamestown, Kansas; Francis Berkebile, Marion, Kansas; Ernest E. Gessala, Cozmet, Kansas.

Of this group 27 are women and 13 are men. Thus far these teachers are meeting with success in their work. Although the percentage of successful applicants for school positions has increased each year, it is probable that this year's list is larger than any before.

### ALUMNI TO INTRODUCE TENTH YEAR REUNIONS

The board of directors of the Alumni Association decided at their annual meeting to introduce the plan of reunions of the tenth year class at each commencement season, including with the class of 1929. Steps are being taken now to make this reunion during the commencement of 1929 such an interesting feature of the festivities that other classes will be glad to adopt the plan.

The Reverend Paul K. Brandt of Holmaville, Nebraska is president of his class which numbers among its thirty-four members half a dozen pastors, eight teachers, two ministers, two physicians, two evangelists, a missionary in China, a social worker, one farmer, one chemist, two of three business men, and several happy housewives. The group is scattered from New York in Washington and California, with eight in Kansas. Miss Elizabeth Hoover is the only member of the class now living in McPherson.

Joe R. Yoder is attending the Kansas State Agricultural College at Manhattan.

Oliver Ironsberry, working in Rocky Ford, Colorado.

**A YEAR AGO THIS WEEK**

Moffat Eakes was elected captain of the Bulldog football team.

**FIVE YEARS AGO THIS WEEK**  
M. C. wins from St. Mary's 17-0. Enrollment reaches high peak at 429.

**SEVEN YEARS AGO THIS WEEK**  
Enrollment this year showed that there were 128 girls and 150 men.

**EIGHT YEARS AGO THIS WEEK**  
McPherson College lost to St. Mary's 17-14.

**NINE YEARS AGO THIS WEEK**  
Dr. A. J. Culler is acting president of McPherson College in the absence of Dr. D. Webster Kurtz.

MISS MILDRED THUROW

Miss Thurow comes to us very highly recommended from the Kansas State Agricultural College at Manhattan where she received both her B. S. and M. S. degree. She is in charge of the Home Economics department.

### TWELVE COLLEGE GIRLS IN HOME MECHANICS CLASS

Prof. H. N. Boone, head of the department of Industrial Education, has twelve college girls in his new class in Home Mechanics. His is a new course, which is an invention of Professor Boone's, being offered for the first time this semester. It was instituted primarily for women and is a laboratory course dealing with things every housewife deals with in her daily work.

Some of the many things taught in this new course are: the use of common tools; toy making and repair work; the fitting of locks and hinges; elementary electricity; soldering; gas, electric, and water meter reading; furniture designing; study of period furniture; interior decoration; the use of the common finishes such as lacquers, paint, varnish, and enamels; and the tying of common knots.

Professor Boone stated that he knew of no other college offering such a course to women and that it was just an experiment here.

### NINETY-ONE GIRLS SIGN Y. W. MEMBERSHIP PLEDGE

Tues. Sept. 24—Ninety-one girls pledged the Y. W. C. A. membership pledge this morning at the close of the meeting which proposed to make clear the work of each unit of the association's system. The members also designated on which committee they desired to work.

After an organ prelude played by Vera Weaver as the girls assembled, the group sang two hymns. Ruth Blickestadt then conducted the devotional period and briefly explained the work of the association as a whole.

Following a vocal duet "Hail Thou My Lord" by Vera Flora and Ruth Ellenberger, each cabinet member explained the function of her committee and expressed the need for assistance and cooperation in the work of that department.

Everyone was then given an opportunity to sign the pledge which states the purpose of the association.

"We, the members of the Young Women's Christian Association of McPherson College, unite in the desire to realize a full and creative life through a growing knowledge of God.

"We determine to have a part in making this life possible for all people in the task we seek to understand Jesus and follow Him."

### MANY IMPROVEMENTS MADE ON CAMPUS

Thurs. Sept. 26—During the summer the college management made a number of improvements that have enhanced the beauty of our campus and buildings.

New sidewalks have been built from Sharp Hall to the entrance on Euclid street. The approaches and entrances in Sharp Hall have been repaired and the hallways of Sharp Hall have been redecorated. One of the large rooms on the main floor of Sharp Hall has been divided into two smaller rooms, one for a class room and the other one for the office of the Dean.

Both the women's and men's dormitories have been improved in appearance with paint on the interior. Natural gas has replaced coal in the heating plant.

Every student, faculty member, and alumni appreciate these improvements provided by the college management.

### TURNER, NEW MEMBER OF MALE QUARTET

Practice Is To Start Next Week

Thurs. Sept. 26—Mrs. Alma Tate, instructor in voice, announced today the members of the college male quartet. The quartet will be composed of Lloyd Dings, first tenor; Lawrence Turner, baritone; Walter Fillmore, second tenor; and Ross Curtis, second bass. Practice will start some time next week.

W. E. Watkins, '24, chemist at the State College of New Mexico, at Las Cruces.

## J.C. PENNEY CO.

# FANCY SHIRTS

In Three Big Value Groups

\$1.49    \$1.98    98c

The men folks come in for some special attention right now, for we have assembled for them a smart collection of fancy shirts, concentrated at three thrift prices.

The patterns are varied and smart, the materials are the best obtainable at the prices, and the workmanship is of the kind for which J. C. Penney Co. is noted.

## Autumn of '79

While Yale and Princeton were battling to a tie at Hoboken, New Jersey, a small group of scientists, directed by Thomas A. Edison, was busy at Menlo Park, only a few miles away. On October 21, their work resulted in the first practical incandescent lamp.

Few realized what fifty years would mean to both electric lighting and football. The handful who watched Yale and Princeton then has grown to tens of thousands to-day. And the lamp that glowed for forty hours in Edison's little laboratory made possible to-day's billions of candle power of electric light. In honor of the pioneer achievement, and of lighting progress, the nation this year observes Light's Golden Jubilee.

Much of this progress in lighting has been the achievement of college-trained men employed by General Electric.

# GENERAL ELECTRIC

GENERAL ELECTRIC COMPANY, SCHENECTADY, NEW YORK

MARRIAGES THIS SUMMER

Mr. John Whitteck and Miss Arlene Saylor were married at the home of Mr. and Mrs. Norman Saylor near Morrill, Kansas on June 16, by Rev. W. H. Foster of Morrill, Kansas. After a honeymoon trip they made their home at Abilene, Kansas. Mr. Whitteck is engaged by the Weaver Aluminum company and has been very successful in his work.

Mr. Marion Krehbiel and Miss Lela Rhodes were married at the college church of the Brethren by Rev. W. A. Kemble on June 20. After the wedding, Mr. and Mrs. Krehbiel made an extensive tour of the Eastern part of the United States and Canada.

A very beautiful wedding took place on August 1, when Mr. Glen Strickler and Miss Nellie McElfatley were married at the college church by Rev. H. F. Richards, the college pastor. After an extensive honeymoon trip to the west coast, they made their home at Hamaon, Kansas where Mr. Strickler will have charge of the Strickler store.

Mr. C. R. Williams, former teacher in the English department of McPherson College was married in June to Miss Frances Elmer Brazil, Indiana. Mr. and Mrs. Williams spent the summer in the University of Chicago. They will make their home in Stillwater, Oklahoma where Professor Williams continues to teach in the A. & M. College.

Mr. Eugene Grumpacker of McPherson and Miss Mary B. Skope of Hempel, Missouri were married in the Swope home on August 23 by Dr. V. P. Schwalm. Mr. Grumpacker is teacher and coach in the Santa Monica, California high school.

Mary Mohler, A. B. '23, and Benjamin P. Casser, July 31 at Detroit, Michigan.

Mr. Roy Frantz and Miss Ethel Mae Metzger were quietly married at the home of the bride, in Lawrence, Kansas on July 29. After an extended honeymoon tour of the Northern part of the United States they are making their home in Rocky Ford, Colorado where Mr. Frantz is in business with his father.

Gertrude Whitmore, A. B. '24, and Vivian Long, A. B. '25, were married June 9, at High Hill, Missouri.

On August 14 in the College Church took place the marriage of Mr. Philip Voran and Miss Anna Mae Edgcomb of this city. The wedding was performed by Pres. J. W. Kliever of Bethel College. Mr. and Mrs. Voran are making their home in McPherson. Mr. Voran is with the Farmers Alliance Insurance Company, being manager of the General State Insurance Agency.

Hazel Cunningham and A. B. Hardman were married at Denver, Colorado this summer.

Miss Louise Muck was married to Mr. Alfred Means at her home in Glen Elder, Kansas on June 15, 1929. Mr. and Mrs. Means are at home in Valentine, Texas.

Ruth King and Curtis Ruttauff, A. B. '25, were married at Winwood on June 19.

Mr. Vivian Spillman and Miss Mildred Bishop were married at the bride's home on August 3. Mr. and Mrs. Spillman are making their home in Fort Worth, Texas. Mr. Spillman is a chemist for the Prohibition department of the United States government. Mr. Spillman was a teacher in the summer school of McPherson College for a number of summers.

Mary Whitteck and Clifford T. Kabin, A. B. '25, were married at McPherson this summer.

Miss Inez Felton of McPherson was married to Mr. Julian Johnson of Kiowa, Kansas in the Presbyterian Church of McPherson on Tuesday evening of August 5, at 8:00 o'clock. Rev. C. E. Brown, pastor of the Methodist church of Kiowa, Kansas, performed the ceremony. Rev. Cotton assisted with the wedding. Mr. and Mrs. Johnson are making their home in Kiowa where Mr. Johnson is teaching in the high school.

Lola Myers, A. B. '27, was married to Everett Clomons, at Belleville, Kansas this summer vacation.

Miss Daley Miller, daughter of Mr. and Mrs. W. M. Miller of Lyons, formerly of Hutchinson, was united in marriage on the morning of August 14 to Mr. Phillip Spohn, '25 by the Rev. J. D. Harris of the First Methodist church. The wedding was attended by the immediate families of both young people. Miss Spohn was graduated from Southwestern College. After spending a honeymoon in the mountains of Colorado the

Spohns are living in Quinter, Kansas where Mr. Spohn is teaching in the high school.

Ralph Frantz and Hazel Rathoff were married at Rocky Ford, Colorado, September 10th. Mr. Frantz is taking a four year course in mechanics and working on the side in Detroit, Michigan. Mr. Frantz was on the Varsity Debate team in '28 and '29.

DISCOVERS NEW AIR TO SUSTAIN LIFE

McPherson, Kan., Sept. 25.—(AP)—Air different from anything man breathes—yet which supports life in white mice more effectively than normal atmosphere—has been made by Dr. J. Willard Hershoy, McPherson college chemist.

Finding of two new life-supporting atmospheres has come about as a by-product of Dr. Hershoy's seven years' study of what part rare gases play in normal life.

Ordinary air containing about 21 per cent oxygen, 78 per cent nitrogen, and 1 per cent of other gases including argon, neon, helium, krypton, xenon and carbon dioxide. In one experiment helium was substituted for the 78 per cent of nitrogen.

"In a series of tests with this atmosphere," said Dr. Hershoy, "it was found that the white mice were in a brighter, more active and a better, healthier condition than in normal air, so far as could be observed."

The mice also were tested in an atmosphere of 25 per cent oxygen and 75 argon. With this mixture, Dr. Hershoy found the general conditions of respiration, appetite and rest better than in normal air.

But when the percentage of argon was raised by but three points, to 73, the mice could not live. He found that the argon mixture diffused through body cells less rapidly than pure air, and that the helium combination diffused more rapidly. Dr. Hershoy said he believes that the comparatively low density of helium accounts for the difference.

The experiments have been performed upon snakes, rats, frogs, meadow larks, birds, cats, guinea pigs, turtles—in fact upon so many animals that to his uninitiated visitor the laboratory resembles a zoo.

The Kansas chemist believes there is a wide field of practical application for more knowledge about rare gases.

"Specially prepared atmospheres already are being used in submarines, high altitude flying, and in mines," he explains. "The widest field probably will be in pathological applications. It is quite possible that a more complete knowledge of the atmosphere may aid in the control of disease."

PROF. NININGER NEARING THE MEXICAN BORDER

Will Go Into Mexico by Way of Lorrado, Texas

Friday, Sept. 27.—Professor H. H. Nininger, head of the biology department at McPherson college, is nearing Mexico, his destination on his hunt for meteorites. It was learned here recently that he would cross the United States border into Mexico within the next few days.

The college meteorologist was informed that some valuable materials, in which he would be interested, had fallen in Missouri close to Springfield. Nininger and party dog up this material and sent it to the Field Museum at Chicago where the material is to be analyzed. The value of the material will be known later.

From Springfield Professor Nininger traveled to the state university at Austin, Texas. From there he will go to Lorrado, Texas, a border town, to get supplies for his scientific expedition.

Nininger reports to friends here that he and his party are enjoying the trip thus far greatly. Within a few days he will be deep in his work of discovering new meteorites, the professor believes.

Students Attention

For self supporting students desiring financial remuneration work either temporary or permanent, I suggest that many students of both sexes have earned scholarships and cash sufficient to defray all college expenses, representing national magazine publishers. If interested, write or wire for details—M. A. Steele, National Organizer, 15 Columbus Circle, New York, N. Y.

ALUMNI NEWS

The publication of the Alumni Directory which was postponed last spring is scheduled for the next few weeks.

Milford Kuhn, A. B., '25, has completed his work for the medical degree from the University of Kansas and is now located at the Army Station Hospital, Fort Sam Houston, San Antonio, Texas.

Mr. and Mrs. Paul Kritz of Ocean Side, California, announce the birth of twin girls.

Lola M. Hill, A. B., '20, is studying home economics in the Graduate School of the University of Wisconsin.

Invitations are out which announce the coming marriage of Roberta Brown, A. B., '28, to Franklin Evans, B. S., '28, at Hutchinson, Kansas, on the fifth of October. The new home will be open at Kearney, Nebraska, on November first.

Miss Adelaide Glaser, B. S., '27, has a very good position in research work in home economics and chemistry at the Agricultural Experiment Station of the University of Tennessee, at Knoxville. Miss Glaser was given a master's degree at the Kansas State Agricultural College at Manhattan.

Clon Jones, A. B., '18, after a successful term of service as principal of the Reading, Pennsylvania, High School, comes to Tulsa, Oklahoma, this year as Assistant Superintendent in charge of high schools.

Mr. and Mrs. Marathon High of Columbus, Ohio have a daughter, Norma Jean, who was born March 7, 1929. Mr. High was graduated in '24 and Mrs. High in '25.

Prof. and Mrs. W. E. Watkins stopped at McPherson College Friday on their way to New Mexico where he is nutrition chemist in the State College. They were accompanied by Mrs. A. J. Fieberbaugh.

Mr. Earl Kinzie and Miss Margaret Davilbon were campus visitors Saturday and Sunday.

FORENSIC CLUB MEETS FOR FIRST SESSION

An interesting program was given in the chapel auditorium Monday in the interests of college forensics. Over fifty students were present for the meeting and many of this group signed for membership for the coming year. During the evening program Professor Hess, sponsor of the forensic organization, gave a short talk on "The Values of Forensics in College". The remainder of the program was as follows:

Reading, Esther Brown; debate discussion on the topic "Resolved, that it is better to be handsome than smart"; David Williams; Piano duet, Viola Dewildras and Pauline Dell. After the program was over Otto Whitteck, president of the forensic club, took charge of the meeting and some matters of business were discussed.

The forensic club plans to have a program every two weeks similar to the one given last Monday. The officers are urging all students who are interested in this department of work, whether a participant or not, to attend these bi-monthly gatherings. During the year the club plans to have either a party or picnic for its members. A committee for this purpose has been appointed by president Whitteck.

The purpose of the club is to create interest and assist persons who are interested in forensics of any kind, and to cooperate with Professor Hess in promoting a forensic program for the year that will be a credit to the college.

"We welcome any students, whether debaters, readers or orators," said president Whitteck, "and we believe that this organization will be a factor in developing talented speakers". The officers have set as their goal for this year, 50 members. Consider the unusual interest at the present time it is probable that this number will be exceeded.

Dorothy Myers is teaching in a grade school near Nickerson, Kansas.

BIG HOMECOMING PLANNED FOR ALUMNI

Tues. Oct. 1.—The Bulldogs want to beat the Swedes this year in the annual Thanksgiving Day encounter. To do this they must have the support of every alumnus and the active support of as many as possible.

There is to be a big homecoming celebration to be held somewhere around Thanksgiving. Plans are not completed but will be announced in the near future.

Inquiries should be directed to some member of the committee, composed of professors, McGuffey, Fries and Boone and John Wall.

John Harzly is attending the University of Kansas.

Oliver W. Pitwood, Wheland, Illinois, Director of physical education, John Berkebile and Verma Deaver visited at their home at St. John over Sunday.

STROUSE'S THE BEST STORE FOR MEN

**ARTIFICIAL DIAMONDS  
MADE BY M. C. CHEMIST**

Chemists of the world have been asserting that artificial diamonds cannot be made in laboratories, but Dr. J. Willard Hershey, head of the Chemistry Department of McPherson College, McPherson, Kansas has demonstrated that diamonds of a minute nature can be made by man.

A few years ago an article appeared in one of the local papers of McPherson stating that artificial diamonds have never been made and likely never would be. This proved a stimulant to Dr. Hershey and two of his students, Marathon High and Glade Fisher, who at once began to study the experiments already attempted by other chemists. The following year Loren Beckwith, another student, found the largest synthetic diamond ever made.

Having their theory upon that of Moissan, the French chemist, who in 1896 after patient and careful ex-

DR. J. WILLARD HERSEY

perimenting succeeded in obtaining microscopic particles of artificial diamonds. Dr. Hershey and his two students immediately set to work.

A small electric furnace, capable of securing a temperature of 3000 degrees centigrade, was obtained. The temperature obtained by Moissan in his experiments seldom exceeded 2000 degrees centigrade.

The composition of diamonds is practically pure carbon. Diamonds made by nature were formed under excessive temperature and pressure. Common sugar, one of the purest forms of carbon compound and iron filings were placed in a small crucible about ten centimeters high and seven centimeters in diameter. The crucible was in turn, with its contents, placed in the electric furnace and 3000 degrees centigrade obtained.

When sugar is burned pure carbon remains. Under a very high temperature the iron filings melt and the carbon is mixed in with it. The theory is that when the molten iron is thus into an ice cold salt brine an external pressure of ten tons to the square inch is exerted.

The crucible remains in the furnace for fifteen minutes and is then removed, white-hot, and dropped into a vat of ice cold salt brine. The enormous pressure exerted upon some of the sugar carbon changes it into small crystalline particles of diamonds.

After the metal has cooled the iron is dissolved in aqua regia, which takes about a week's time to complete. The remaining residue consists largely of amorphous carbon. This is dissolved in hot concentrated hydrochloric acid with dissolved potassium chlorate, followed by hot concentrated sulfuric acid with dissolved potassium nitrate, which destroys most of the carbon. The remaining residue is treated with hydrofluoric acid.

The most trying task of the experiment is the search and testing for diamonds in the remaining residue. Hundreds of microscopic particles and some larger diamonds have been produced at McPherson College. The largest one made by Dr. Hershey is four times as large as the largest made by Moissan or anyone else that has been recorded. As far as is known no genuine diamonds have ever been made in the United States other than those made in the McPherson laboratory.

Dr. Hershey believes that the artificial construction of diamonds from the scientific point of view is no longer an unattainable goal, and that the difficulties that prevent the produc-

tion of large and beautiful diamonds are only technical.

It is the hope of those making diamonds at McPherson to produce artificial diamonds large enough for commercial use and at a reasonable expense.

**AN ADEQUATE ALIBI**

One minute . . . Two minutes . . . Three minutes.

Time was passing and the students de frantically were becoming decidedly restless. Never before had the professor been late.

Worry puckered the brows of the more conscientious linguistic aspirants. Could the unsuspecting instructor have fallen prey to foul play?

Someone softly whistled "One Fleeting Hour". With sympathetic designs another suggested the organization of a search party. Others were ready to comply when—who should appear but the object of their anxiety.

Knowing him to be punctilious to the Nth degree, the French students were not a little surprised to see Professor Utrecht's countenance wreathed in smiles instead of avoirdupois with shame because of his tardiness.

But the dear professor merely smiled mysteriously and not until later was the secret of his peculiar behavior disclosed.

The water scalded while he was preparing his breakfast—a fact which, of course, delayed him.

But why, the public demands, should this call forth joy? And why, pray, was Mr. Utrecht, whose culinary talents are not at all universal (or even municipal) renown, preparing his own breakfast?

Ah, yes! Here's the reason: A new daughter arrived at the home of the modern language teacher Tuesday, September 21, hence his tardiness and joy.

**DEAN MOHLER STUDIES IN MEXICO DURING SUMMER**

Spends Three Weeks Studying Various Conditions of the Country

(From the Spectator, Sept. 17)  
Three weeks of Dean R. E. Mohler's vacation were spent, with a party of seventy students, studying conditions in Mexico in an effort to

bring about more friendly relations between that republic and the United States. The group was sponsored by the committee on Cultural Relations with Latin America and was composed of people from twenty-four states who were representatives of many educational, journalistic and professional interests.

An intensive program of lectures and trips to the agricultural colleges, the rural schools, normal schools, churches and pyramids were provided by the committee in cooperation with the Mexican government.

“Enormous amounts of money are being spent each year for the opening of schools and the financing of clinics in an effort to reduce illiteracy and raise the health standards of the mass of people”, Dean Mohler stated.

Dean Mohler spoke highly of the scenic beauty of Mexico and its invigorating climate, which he said, aside from the educational value would make such a trip well worth while.

**MEN'S GLEE CLUB**

Mon., Sept. 30—The Men's Glee Club was announced this morning by Mrs. Tate, instructor in voice. The new members will meet Wednesday evening at 6:30 for organization. The members are as follows:

Charles Austin, Ernest Botta, John Berkebile, Ross Curtis, Irwin Dressler, Lloyd Biggs, Milton Early, Walter Filmore, Vernon Fleming, Blanch Harris, C. O. Heidebrecht, Cleo Hull, Ora Martin, Nyrus Nelson, Raymond Peterson, Lawrence Turner, Sher Tice, Donald Treat, Orville Veran, and Harry Zinn.

**HESS STATES PROSPECTS ARE GOOD FOR DEBATE**

According to Prof. Hess, debate coach, the prospects for winning debate teams are good.

There are no varsity men back and only two second team men, Otto

Whiteneck and Guy Hayes, but Prof. Hess says that new material is showing up in every class.

Men of the freshman class who are possible material are: W. Williams of North Dakota, who debated on the High School State Championship team; Blanche Harris of Idaho; M. Miller of Colorado; Gottman of Missouri; Neuhery of McPherson, all who have had debating experience in high school.

Material for the women's team looks good to the coach. He says if he can get the women to take a great interest in debating he can make a winning team.

Let us all boost for championship teams in debate this year.

Mr. and Mrs. Mike of Sabulha spent the week-end with their son, N. Harold.

Alvin Vorsu, '28, is visiting here for a few days. He is studying music in Chicago.

# SPORTS

## CANINES BRING HOME FIRST FOOTBALL VICTORY

Captain Nonken Gives Crowd Many Thrills

BULLDOGS 25, KEARNEY 0

Many Substitutions Are Made By Coach Gardner

Kearney, Neb., Fri., Sept. 27.—The McPherson College (Kan.) Bulldogs defeated the Kearney Teachers here this afternoon, outclassing them by a score of 25-0. Captain Nonken, Lionside Canine quarterback, furnished many thrills for the spectators with his line plunges and long runs on the broken field, which helped him cross the opponents goal line three times. The Bulldogs scored in each period of the game except the third quarter. The first counter came when Nonken returned a punt from his own forty yard line and raced through a broken field for a touch down.

The game was the first of the season for each team and resulted in being loosely played. Many substitutions were made by Coach Gardner of McPherson, with an apparent halt in the progress of the game. Evidently the Bulldog machine will be in fine shape to meet the Kansas Wesleyans at Salina next Friday. The McPherson team outclassed the Kearney team both in size and experience and it has been stated by keen observers that the Bulldog grid athletes look better this year than for a number of years.

In summary the Kearney game was like this:

First downs—McPherson 18, Kearney 2.

Yards gained from scrimmage—McPherson 247, Kearney 16.

Forward passes—McPherson attempted 16, completed 5 for 113 yards. Kearney attempted 11, completed 6 for 64 yards.

Punts—McPherson 9 for 391 yards, average 38 yards. Kearney 8 for 316 yards, average 34 1/2 yards. Total yards gained—McPherson 256, Kearney 80.

Punctures—McPherson 3 for 25 yards. Kearney 6 for 10 yards.

## BEAT THE COYOTES FRIDAY.

### GARDNER ENCOURAGED

Thinks He Has Fine Army of Talents at McPherson

(From Topeka Daily Capital)

McPherson, Kan., Sept. 24.—(Special)—There is no such thing as a free lunch in Coach George Gardner's Bulldog camp this season. Gardner, who as a rule is uncommunicative as to what he thinks his team will do, is openly expressing the opinion that McPherson college has the best array of talent out for football this fall that has been allotted him in the four years he has been at the helm at the local school, and judging from the manner in which the Canine candidates are working out in preparation for a pre-season game to be staged against Kearney college at Kearney, Neb., Friday of this week, Gardner's confidence is not misplaced.

With the exception of Blickenstaff, an end, and Wells, quarter, Gardner has his entire first string outfit of last season, and an array of new talent that is already making a number of the veterans wonder just how far they are going to get in their task of holding on to their jobs.

Of last season's men, Nonken, Swain and Miller, a trio of fast traveling end-circling backs, hard line hitters, and deadly at the passing game, are back and are looking better than ever. Hockstesser and Sargent, last-year ends, Wine and Bowman, tackles, Wisdmill, Whitesock and Zink, guards, and Bowers, center, are seasoned men, upon whom Gardner should be able to place a lot of responsibility. Of last year's second team string, O. Whitesock, center, P. Haragrove, back, King, Teek and Higgs, guards and McWhay and Anderson, tackles, are seeking promotion this season.—Topeka Daily Capital.

CAPTAIN RAY NONKEN

Wed., Sept. 25.—Ray Nonken, center, and president of the "M" Club, was elected captain of the 1929 football team by his teammates this afternoon. Nonken has been a backfield man on the Bulldog team for the past three years and during that time has won the support and admiration of teammates and fellow students through his unswerving sportsmanship. Nonken is one of the most capable ball players that McPherson college has ever had. His cool-headedness together with his knowledge of the game and his ability to run on a broken field make him an object of respect to his opponents. Ray is a consistent player, always reliable with plenty of pluck and his personality has a remarkable influence upon his fellow players. Nonken piloted the Bulldog team in 1928 and it was due to his representation of the team Bulldog spirit that his teammates saw fit to choose him as their leader again. This blond, all-around athlete has made an enviable athletic record for his college and students have a right to feel that their support will be repaid in the building of other records.

Friday, Captain Nonken led his fellow gridsters on the field against the Kearney Teachers in Nebraska and on October 4 he will have the thrill of leading his teammates onto the gridiron, facing the Kansas Wesleyan Coyotes at Salina in the first conference battle of the season.

## McPHERSON COLLEGE FOOTBALL SCHEDULE

- October 4—Kansas Wesleyan at Salina.
- October 12—St. Mary's College at St. Mary's.
- October 18—Ottawa University here.
- October 25—Open.
- November 1—Baker University at Baldwin.
- November 8—Bethel College, here.
- November 15—Stout College here.
- November 22—Bethany College "Terrible Swedes", here.

## THREE SOCCER TEAMS HAVE BEEN ANNOUNCED

This Sport Offers One Hundred Points To Each Player

Thurs., Sept. 26.—Aspiring to win points in the Women's Athletic Association, thirty girls this afternoon began soccer practice southeast of the Alumni gymnasium.

With Genevieve Crist, soccer manager, acting as chairman of the group, the girls decided to practice Monday, Tuesday and Thursday afternoons each week at four thirty o'clock.

The sport offers a possibility of winning one hundred points. Those girls who attend practice regularly receive seventy points, and those on the winning team and on the varsity team receive fifteen points respectively.

Not unlike football, soccer offers outdoor exercise and wholesome fun, according to these feminine athletes. Alertly and good kicking ability characterize the good soccer player and each girl is aspiring to become a member of the varsity team which will be chosen at the close of the season.
